With more and more smart electronics playing a vital role in our day to day lives, they deserve an even smarter role at home. Controlled Homes have the solution, making it possible for virtually any appliance or device in your home to intelligently communicate with one another-from curtains to cameras, gates to garage door-and you the ability to control them, no matter where you are.

Create the perfect movie ambiance at the touch of a button. Talk to your thermostat from Toronto. Manage music in multiple rooms. Get a text when your teenager comes home. Controlled homes gives you comfort to design a home automation system of your dreams on a very real budget.

**Happy homes are Controlled Homes.**
